PROFESSIONAL SUMMARY

B.Tech Information Technology student with a 9.15 CGPA and strong foundations in full-stack software engineering, backend systems, and Applied AI. Experienced in building advanced Retrieval-Augmented Generation (RAG) systems, AI workflows, scalable APIs, and data-driven applications. Demonstrated ability to develop AI-native product features, automate workflows, and build production-grade software in fast-paced startup environments. Passionate about agentic systems, autonomous agents, product engineering, and solving complex engineering problems.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, C
- **AI & ML:** LangChain, Advanced RAG Systems, LLM Inference, Vector Embeddings, Semantic Search, Prompt Engineering, AI Workflows
- **Backend Engineering:** Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, CRUD Operations, API Development
- **Databases:** MongoDB, MySQL, ChromaDB
- **Frontend Development:** React.js, Angular, HTML5, CSS3
- **Tools & Platforms:** Git, GitHub, Firebase, Vercel, VS Code, Figma, Power BI
- **Core Concepts:** Data Structures & Algorithms, DBMS, Computer Networks, OOP, Operating Systems

EXPERIENCE

Web Development Intern *Feb 2026 – Apr 2026*
Infosys Springboard

- Engineered a role-based civic engagement platform featuring secure authentication, geo-tagged data tracking pipelines, and scalable backend services.
- Designed and optimized relational database schemas and MySQL query workflows to ensure transactional consistency during concurrent write operations.
- Collaborated within an agile team environment to deliver production-ready software features while maintaining code quality and reliability.

PROJECTS

DocMind – Advanced RAG & AI Pipeline *React.js, FastAPI, LangChain, ChromaDB, MongoDB*

- Architected an agentic RAG system utilizing semantic chunking, dynamic query routing, and document indexing to deliver accurate page-level citations across complex document collections.
- Developed an end-to-end Applied AI pipeline integrating HuggingFace embeddings, ChromaDB vector retrieval, and Groq LLaMA 3.3 for scalable, low-latency LLM inference.
- Built asynchronous FastAPI backend services and metadata management workflows enabling reliable session handling and efficient document processing.
- Automated AI workflows for document ingestion, retrieval, and response generation, improving information accessibility and user experience.

InkFlow – Scalable Content Platform *React.js, Node.js, Express.js, MongoDB, JWT, REST APIs*

- Optimized backend response time by 40% through redesigning MongoDB aggregation pipelines and indexing frequently accessed collections.
- Architected secure RBAC-based authentication workflows using JWT and middleware validation to enforce authorization across multiple user roles.
- Developed high-concurrency RESTful APIs supporting secure and transactional CRUD operations for distributed multi-user environments.
- Implemented scalable backend services aligned with SaaS platform development principles.

Civix – Automated Civic Engagement Platform *React.js, Node.js, Express.js, MySQL, Angular*

- Engineered automated relational workflows and structured data pipelines for real-time data ingestion and processing.
- Developed interactive analytics dashboards enabling real-time visualization of civic participation metrics and operational insights.

- Ensured data consistency and reliable state synchronization across concurrent user interactions.

EDUCATION

VNR Vignana Jyothi Institute of Engineering and Technology Hyderabad, Telangana
Bachelor of Technology in Information Technology Expected 2027

- CGPA: 9.15/10.0

ACHIEVEMENTS

- Selected Participant – Adobe India Hackathon.
- Competed in Google Developer Groups (GDG) Solution Challenge.
- Built multiple production-grade full-stack applications emphasizing scalable architecture, API design, and data validation.

CERTIFICATIONS

- Web Development – Infosys Springboard.
- JavaScript Essentials 1 & 2 – Cisco.
- Python Essentials – Cisco.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

ACM VNRVJIET Student Chapter *Design Volunteer*

- Developed promotional materials and visual assets to enhance outreach and student engagement initiatives.
- Coordinated with cross-functional teams to support technical events and coding competitions.
